Career Objective

To secure a challenging position in the field of Computer Science and Engineering where I can utilize my programming, web development and analytical skills to contribute to innovative software solutions while continuously learning and growing.

Educational Qualification

B.E - Computer Science and Engineering | V.S.B Engineering College, Karur (2023-2027) | CGPA: 8.4

Higher Secondary - Vivekananda Vidyalaya Matric Higher Secondary School, Palani (2023) | Percentage: 86%

SSLC – Vivekananda Vidyalaya Matric Higher Secondary School, Palani (2021) | ALLPASS

Technical Skills

Programming Languages: Java, Python

Web Development: HTML, CSS, JavaScript

Internship Experience

- During my internship as Full Stack Developer I Built a full-stack e-commerce platform for an **online nursery** featuring comprehensive product management and database integration to streamline plant sales and inventory tracking processes.
- I Designed a streamlined Staff Tracker System to efficiently manage and monitor employee attendance and daily activities, enhancing organizational workflow and digital record-keeping capabilities.

Project Presentation

- **Blockchain based E Voting System:** Developed a secure, decentralized e-voting system using Blockchain technology to ensure transparency, data immutability, and tamper-proof digital election results.
- **Decentralized Ledger Insights and Visualizer:** Built a project where users can add transactions, generate cryptographic hashes, and visualize secure block linking, ensuring data immutability and also check the what happen when the data is tampered.
- **Real time Mood Tracker:** Developed a full-stack web app that leverages Computer Vision to detect and track human emotions in real-time, providing seamless facial expression analysis directly through the browser.

- **Scholar chain and Blockchain Certificate Verifier:** Developed two similar projects users can either generate their Certificate id and verify the certificate or Upload Your certificate and verify using Blockchain and smart contracts to ensure transparent scholarship distribution and fractional ownership.
- **AI-Powered Smart Attendance System:** Developed a real-time attendance tracking system using JavaScript and Face-api.js, achieving automated student recognition with high accuracy.
- **AI-Powered Retrieval Augmented Generation System:** Developed an AI-Powered RAG System using Python and Streamlit that effectively indexes and retrieves specific logic points from PDF documents and provides accurate search results.
- **Secret Key Reconstructor (Shamir's Secret Sharing):** Built a web tool that takes uploaded JSON files, reads the encrypted secret pieces, and automatically calculates the original password using Shamir's algorithm.

Paper Presentation

- Presented an idea about Automated Translation in Live sessions combining speech recognition and machine translation to provide accurate, real-time subtitles or voice output, improving accessibility and engagement.
- Presented an idea about Identifying Fake Products through Blockchain Technology ensure product authenticity through immutable, transparent digital verification.

Achievements

- Achieved 700+ points in Talentely.
- Cisco Networking Academy – Introduction to IoT and Cybersecurity.
- AWS Educate Badge: Cloud Computing 101 Trained.
- Certified in Generative AI by GUVI & HCL.
- Software Engineering & Agile Certification | Infosys Springboard.
- Java Foundation Certification | Infosys Springboard.
- State-level Silambam player with competitive experience.
- Hold a Certificate in Classical Dance from Annamalai University.

Soft Skills

- Problem Solving & Analytical Thinking.
- Teamwork & Collaboration.
- Effective Communication.
- Adaptability & Quick Learning.
- Flexibility.
- Leadership & Responsibility.
